

Ğ1 Currency

For a Libre and Parallel Economy

Ğ1 is the first Free or Libre currency, introducing an innovative mechanism for money creation, delivered through sustainable blockchain technology, encouraging decentralized, community-level exchanges. Instead of a centralized private system creating money through debt, or a competitive and sometimes energy intensive process of mining the currency,

Ğ1 is co-created equally every day, by all participating men, women and children

putting human well-being firmly at the centre of a Ğ1 economy.

How does it work?

- ✓ Decentralized debt free system based on human time, where people co-create money everyday, called a Universal Dividend or UD (**it's free** to join and to become a Ğ1 co-creator)
- ✓ Not connected to any crypto exchange. No point to speculate. More like a tool to foster a parallel economy with men and women at the heart of it.
- ✓ The blockchain and all its tools are Libre or FLOSS softwares. It has been developed for the past 6 to 9 years on developers' free time (mostly French). who gather 1 or 2 time / year to improve it. A Ğ1V2 is currently being developed to allow millions more people to join.
- ✓ Based on a sound monetary theory with 4 economic freedom principles in its core
- ✓ Innovation: it has implemented a **Web of Trust**, which is an innovative decentralized authentication system (like peer-to-peer) to validate new Ğ1 co-creators, that can NOT be controlled by a central authority.
- ✓ Already 8000 ppl co-creating Ğ1s in Europe, Canada and exchanging goods and services in Ğ1 during local barter and craft markets.

How to get started?

- 1. Learn more and meet Ğ1 users**
- 2. Create your own Ğ1 wallet**
- 3. Trade goods and services**
- 4. Become a Ğ1 co-creator**

To start co-creating UD everyday, you must have your account certified by 5 other living women and men who are members. This minimizes fraud in the Ğ1 system, and maximizes community. No need to rush, your certifications will come naturally as you trade and meet with other Ğ1 users. This is not just about co-creating Ğ1 money but more about creating connections between men and women, and developing a parallel economy where everybody thrives. It will only work if everyone brings their own value by exchanging valuable goods and services with others (crafts, food, tools, services, knowledge, etc.). You can first start offering goods and services to the Ğ1 community and build your own social Ğ1 network, and then your certifications to become a Ğ1 co-creator yourself will come along naturally.
